

# UROCLEAN SHUTTLE

Uroclean Shuttle is a patented reusable urine drainage system which is held on the penis by friction fit – without adhesive and need for shaving

## KEY FEATURES

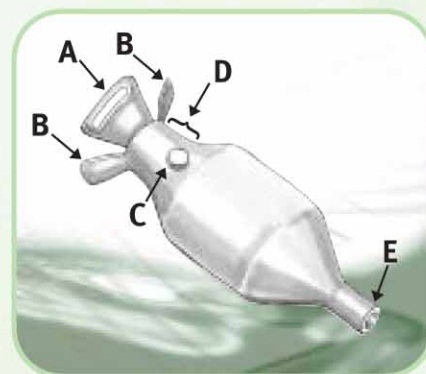

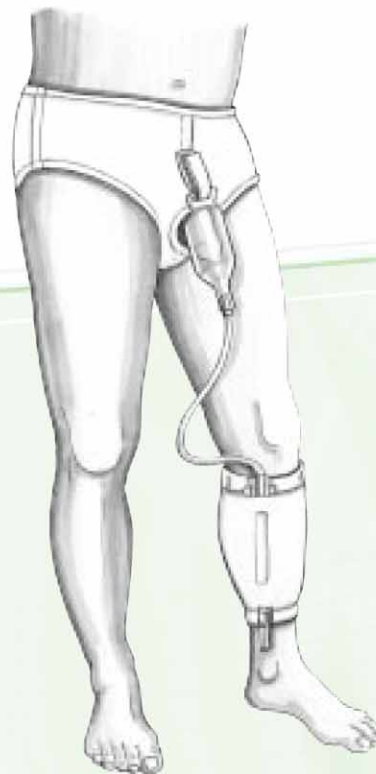

- 4 UROCLEAN SHUTTLE units
- 5 Uroclean pants
- 1 Uroclean belt
- 4 Uroclean caps
- 1 pair of Velcro straps
- 1 leg bag
- 1 fabric pocket with Velcro closure, suitable for machine washing
- 1 application aid

## BENEFITS

- Uroclean Shuttle is a patented reusable external urine drainage system for male urinary incontinence. Due to the high static friction of the highly elastic silicone and the patented shape, the Uroclean Shuttle is held in place without skin adhesive. It can be used with a penis diameter of 25 to 40 mm and from a penis length of 30 mm. Shaving the genital area is not required, as no adhesive is used to hold the device in place. Thus there is no risk of local complication and irritation of the skin. The system even provides a tight seal in lying position.
- Made of highly elastic, skin friendly pure silicone (non-allergenic)
- Comfortable to wear without pressure points
- Held in place without adhesive through high static friction and patented anatomical shape (shuttle)
- Reusable (cost saving, waste prevention, even machine washable at 90 °C)
- Easy to use without need for shaving and adhesive

## PRODUCT DESCRIPTION

- A** Fastening tab for attachment to belt or underpants by means of Velcro fastener
- B** Tabs for smoothing out the device on the penis, in order to ensure perfect fit
- C** Vent
- D** Contact portion (minimum length of penis: 3 cm)  
Not suitable for retracted penis
- E** Outlet port for connection to bedside bag or leg bag tube
